

Kevin Agustin Ruiz

Cover Letter

Dear GMV Talent Acquisition Team,

I am writing to express my strong interest in joining **GMV** as a **Fullstack Developer Trainee** for the **ESTHER risk analysis platform**.

As a student of **Information Systems Engineering** and a developer with practical experience in **frontend and backend technologies**, I am highly motivated to contribute to projects that combine **software development, innovation, and the space/defense sector**.

During my previous experiences and academic projects, I have worked with:

- **Frontend technologies:** React, TypeScript, TailwindCSS — creating efficient and user-friendly interfaces.
- **Backend development:** Python (FastAPI, Django), Node.js, and Express, including REST API design and integration.
- **Databases:** PostgreSQL and MongoDB.
- **AI & LLM integration:** real-time chat analysis and dataset processing with NLP/ML models.
- **DevOps practices:** Docker, GitHub Actions, CI/CD pipelines, and cloud deployment on AWS/OCI.

I am particularly motivated by the opportunity to apply these skills to the **ESTHER platform**, ensuring **usability, security, and efficiency** while also contributing to the integration of **AI algorithms** for advanced risk analysis.

What excites me most about GMV is your focus on **space, GNSS, ICT, and defense systems**, where technology directly supports **mission-critical operations**. Being part of such a team would allow me to grow professionally while contributing my technical background and passion for **innovation, problem-solving, and multidisciplinary collaboration**.

I am confident that my mix of **academic training, hands-on project experience, and enthusiasm for the space sector** make me a strong candidate for this position. I would be honored to contribute to GMV's mission and be part of a team that tackles challenges as ambitious as space exploration and defense technology.

Thank you very much for considering my application.

I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Kevin Agustin Ruiz
