Summary

I am passionate about technology, software development, and machine learning. I am driven by innovation and the creation of practical solutions that contribute to scientific-technological progress.

My goal is to grow professionally as a developer and systems engineer, integrating my knowledge in programming, analysis, and project management to contribute value in technical teams and R&D initiatives.

Experience

Fullstack Developer - Web3 Dapps, Key Protocol – https://github.com/KEY-protocol   Oct 2025 – Dec 2025
- Responsible for development and team coordination to create a tool for identity and documentation validation.
- Speeding up verification processes and digital safeguarding of information for NGOs and entities.

Fullstack Developer, FooTalent Group (Job Simulation) – https://github.com/ FooTalentGroup/konfex-web-app   Oct 2025 – Dec 2025
- Developed a CRM tool for calculating, managing, and administering orders for textile products and manufacturing production.

Frontend Developer (Volunteer), Projectos DAR – Online   Aug 2025 – Oct 2025
- Development of systems aimed at expanding digital infrastructure and improving user interaction for allied NGOs.

Fullstack Developer / LLM Python Programmer, No Country (Job Simulations) – Remote   Feb 2025 – Aug 2025
- Development of a real-time analysis tool for corporate chats with **AI** (GROK Model).
- Platform for analyzing large-capacity datasets with dynamic queries based on specific metrics.
- Web platform for user management across different health services and medical studies organization.

Education

National Technological University, BS in Information Systems Engineering – Buenos Aires, Argentina   Apr 2024 – present

Featured Projects

ConstelAr   Oct 2025
Platform with satellite connection to TEMPO for early detection of contamination and health consequences.

DataSense   July 2025
Dataset analysis platform with **AI** suggestions and ETL implementation using Grokx model.

Product Management   July 2025
Real-time management platform for orders, clients, and products.

UpTask Project Management   June 2025
Project management tool with roles and task tracking.

Skills

Programming Languages: Python, **TypeScript**, JavaScript, C

Tools and Frameworks: ReactJS, NextJS, NestJS, ExpressJS, TailwindCSS, AWS, Docker, PostgreSQL, MongoDB, Git

Data Science & AI: Pandas, Numpy, Scikit-learn, Matplotlib, Seaborn, Grok Model

Languages: Spanish (Native), English (B1), Italian (A2), French (A2)

Supplementary Education

- Data Science, Machine Learning, and DevOps - Alura LATAM
- Web Development & **Python** - Udemy
- Software Development - Grupo NEORIS
